

# rapID

Rapid, reliable biometric identification—delivered  
anywhere officers need it.

## RAPID KEY FEATURES

**Mobile Biometric Capture:** Collect high-quality fingerprints and facial images directly from supported mobile devices.

**Real-Time Identity Queries:** Submit biometric data to state ABIS and FBI NGI systems for immediate search and match results.

**FBI RISC Search:** Access the Repository of Individuals of Special Concern for rapid detection of high-risk individuals.

**Field-Ready Performance:** Designed for fast, reliable operation in dynamic environments and varying connectivity conditions.

**Secure Web Management Portal:** Provision devices, manage user accounts, configure policies, and monitor system health.

**Live Submission Dashboard:** Enable dispatch and supervisors to track transactions, alerts, response codes, and match details in real time.

**Robust Security Architecture:** Encrypted data capture, transmission, and storage aligned with strict criminal-justice standards.

**Scalable Deployment:** Supports large fleets of users and devices across agencies, regions, or multi-jurisdictional programs.

This system empowers mobile devices running the RapID software to capture high-quality biometric data (fingerprints and facial images) and securely submit them to the state's AFIS/ABIS system and the FBI Next Generation Identification (NGI) program for rapid identity verification in the field. Functionality includes maintaining a secure, direct connection to the state's AFIS/ABIS system, which is used to securely route biometric search transactions to the FBI's NGI system for RISC repository queries. Officers gain near-instant identification of individuals with wants or warrants, immigration violators, registered sexual offenders, and known or suspected terrorists—enhancing situational awareness, safety, and operational efficiency.

The solution also provides a centralized web-based management dashboard that enables administrators to provision devices, manage users, and monitor system health, while a real-time submission dashboard gives dispatch personnel immediate visibility into all transaction activity and response details.

RapID is available exclusively from **Lakota Software Solutions**. Visit our website at [lakotasoftware.com](http://lakotasoftware.com) or contact our sales department at [sales@lakotasoftware.com](mailto:sales@lakotasoftware.com).

# rapid

The screenshot shows the RapID web interface. At the top, there's a navigation bar with 'Home', 'Submissions', 'Users', 'Devices', and 'Agencies'. The user is logged in as 'Aaron' from 'LAKOTA SOFTWARE (WV/LAKOTA1)'. The main content area is titled 'Recent Submissions' and features a table with columns for TCN, FBI/State Match, Status, Date Submitted, and Submitted By. Below the table, a detailed view of a submission is shown, including a mugshot of a man and a table of response data for both FBI and State. The submission details include fields like ATN, UCN, NAME, POB, SRF, REPO, CR#, SID, NAME, DOB, SRF, CASE TYPE, and OFFENDER TYPE. A disclaimer note is also present at the bottom of the detailed view.

FBI Response			
ATN: WVSP	UCN: 3333X	NAME: DART, JOSEPH	POB: WV
SRF: R	REPO: RISC_WANTS_AND_WARRANTS	CR#: WVWSP000	

State Response			
SID: WV99M377	NAME: Dr, Joseph	DOB: 19760303	SRF: I
CASE TYPE: Criminal	OFFENDER TYPE: Felon		

Notes  
This response is based on a search of only the repository for individuals of special concern and does not preclude a record from existing in other biometric or name based repositories. Users are permitted to rely on the RISC response in conjunction with other law enforcement tools but shall not rely solely on the RISC response for additional law enforcement action.
